Heatsink For Power Amplifier Module

Version.1.0_2025.05.21

200x150x99/Heatsink with fan

Model Number: KHSF150B

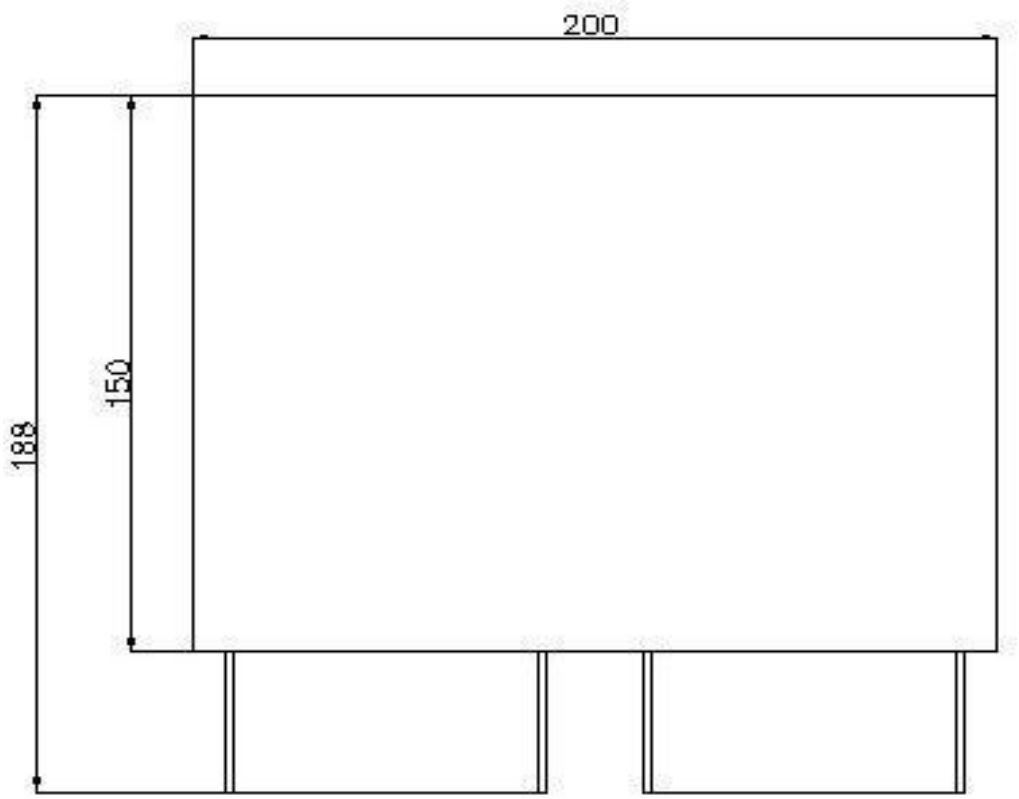

KeyLink KHSF150B is an aluminum finned heatsink specially designed to match our RF power amplifier module for heat dissipation. For better cooling effect, the heatsink usually integrates with two cooling fans as a cooling system. The DC powered fan is with typical voltage of 28VDC and DC current of 0.7A. Its rated airflow is 130CFM and rated noise is 65.5dBa. You can choose the heatsink with fans or without fans accordingly. Keylink's heatsink is widely used for the RF power amplifier module such as: KB0525M50A, KB0810M53A, KB0842M4 7A, KB1020M53A, KB2060M43, KB2060M46A, KB60100M43A, KB801 20M43D and KB80120M46A.

MECHANICAL SPECIFICATIONS

Parameter	Value	Units	Limits
Dimensions	200x150x99 [7.87x5.9x3.9]	mm [inch]	Maximum
Weight	4.1 [9]	kg [lbs]	Maximum
DC Power Supply	28	V	
DC Current	1.4	A	
Operating Temperature	-30～+60	℃
